

Wooltex Wins Every Time

Both said the WOOLTEX Suit was the newer and better looking.

They were comparing a Serge WOOLTEX Suit which had been worn six months with one of another make that had been worn for six weeks.

WOOLTEX won because it was made of pure wool materials, cut and tailored so it couldn't sag or get out of shape.

That's one of the reasons why the purchase of a WOOLTEX Suit is a point of economy as well as of lasting satisfaction.

Let us show you our line of WOOLTEX garments. You will enjoy studying the styles. A careful examination of their tailoring will give you a new standard by which to judge.

Price range on one of the best stocks of Suits we ever carried is

From \$10 to \$35

Ralston Shoes #4

Here's an illustration of the famous Ralston last—the last which has given Ralston Shoes a national reputation for irreproachable style combined with perfect comfort. As you probably know, all other lasts are flat across the bottom—not so with Ralston Lasts—in which are represented every mound and every depression of the bottoms of your feet. It is only by combining "sole fit" with "upper fit" that a perfect fitting shoe can be made. That's why Ralstons need no breaking in.

If you want real foot comfort try a pair of RALSTON SHOES.

PEOPLE'S SHOE STORE.

PURE PAINT

A GOOD THING

LOOK INTO IT

B. P. S. Paint is made of pure carbonate of lead; oxide of zinc (to aid whiteness and durability); Old Process linseed oil, aged, settled and ripened in The Patterson-Sargent Company's own tanks (new oil is not fit to use); and the necessary driers and coloring matter.

B. P. S. PAINT IS PURE.

Using adulterated paint is wasting money. The so called "cheap" or adulterated paint, works improperly under the brush, thus delaying the painter—neither spreads nor covers as well as good paint, thus requiring a larger number of gallons—and will not protect your buildings nearly as long, thus requiring repainting. The markets are full of adulterated leads and oils and adulterated driers and coloring materials, any one of which injures the life and economy of paint.

Your Dealer, with his "just as good" machine mixed paint, may be honest.

Your Painter, with his hand-mixed lead and oil, may be honest.

But neither has facilities for testing and analyzing new materials to protect himself against fraudulent goods.

USE B. P. S. Paint and take no chances. Owing to the purity of materials used, perfect formula, and absolute accuracy and thoroughness of mixing and grinding, B. P. S. Paint gives the best possible results in easy working qualities, covering and spreading capacity, fine finish and durability.
